

Scientific Day Of UNC

8th May, 2025

*Urology & Nephrology Center,
Mansoura University - Egypt*

Scientific Day of the UNC, 8 May, 2025
Urology & Nephrology Center, Mansoura University - Egypt

Time	
09:00 - 09:10	Modulation of naïve mesenchymal stromal cells by extracellular vesicles derived from insulin-producing cells: an in vitro study. Prof. Ayman Refaie
09:10 - 09:20	Functional MRI evaluation of blood oxygen dependent (BOLD) in renal allograft dysfunction: a prospective study. Prof. Mohamed Aboul El Ghar
09:20 - 09:30	Recoverability of Bladder Function in Patients with Defunctionalized Bladder and Live-Donor Kidney Transplantation. Prof. Bassem Wadie
09:30 - 09:40	Laterality of live-donor nephrectomy: does it have a urologic impact on post-donation pregnancy? BMC Prof. Ahmed Donia
09:40 - 09:50	Aprepitant ameliorates vancomycin-induced kidney injury: Role of GPX4/system Xe- and oxidative damage. Dr. Ahmed Mansour
09:50 - 10:00	Dietary habits and weight change during the second wave of the COVID-19 pandemic among the Egyptian population. Dr. Ahmed Yehya
10:00 - 10:10	Egyptian paediatric kidney transplantation pre-transplant guidance highlights on donor and recipient assessment (R. N. 364). Dr. Mohamed Elhadidy
10:10 - 10:20	Impact of CD 28, CD86, CTLA-4 and PD-1 genes polymorphisms on acute renal allograft rejection and graft survival among Egyptian recipients Dr. Motaseim Elsayed
10:20 - 10:30	Elevated uric acid predicts increased coronary artery calcification risk in advanced chronic kidney disease: a cross-sectional study. Dr. Donia Elsaid
10:30 - 10:40	Discussion
10:40 - 10:50	Effect of Copper and Zinc Ions on Biochemical and Molecular Characteristics of Calcium Oxalate Renal Stones: a Controlled Clinical Study. Dr. Wael Mortada
10:50 - 11:00	Does the Presence of Heavy Metals Influence the Gene Expression and Oxidative Stress in Bladder Cancer? Dr. Wael Mortada
11:00 - 11:10	Modulation of naïve mesenchymal stromal cells by extracellular vesicles derived from insulin-producing cells: an in vitro study. Prof. Mahmoud Gabr
11:10 - 11:20	Current status of stem cell therapy for type 1 diabetes: a critique and a prospective consideration. Prof. Mahmoud Gabr
11:20 - 11:30	Molecular evaluation of BH-3 mimics inhibitor of bladder cancer as targeting chemotherapy (review article) Dr. Mahmoud Zakaria
11:30 - 11:40	Urinary congophilia as a predictive biomarker of lupus nephritis in pregnant and non-pregnant women with systemic lupus erythematosus. Dr. Mahmoud Zakaria
11:40 - 11:50	Discussion
12:00 - 12:30	Break

Scientific Day of the UNC, 8 May, 2025

Urology & Nephrology Center, Mansoura University - Egypt

Time	
12:30 - 12:40	Sustainability in Radiology: Position Paper and Call to Action From ACR. AOSR, ASR, CAR. CIR. ESR. ESRNM. ISR, IS3R. RANZCR. and RSNA. Prof. Tarek El-Diasty
12:40 - 12:50	Diagnostic value of PET imaging in clinically unresponsive patients. Dr. Ibarhim Elgamel
12:50 - 01:00	Prospective evaluation of the diagnostic efficacy of multiparametric MRI clear cell likelihood score in small solid renal masses and its predictive value for tumor grade. Dr. Osama Soliman
01:00 - 01:10	Encrusted Pyelitis. Prof. Haytham Shebel
01:10 - 01:20	Early and late assessment of renal allograft dysfunction using intravoxel incoherent motion (IVIM) and diffusion weighted imaging (DWI): a prospective study. Dr. Mostafa El-Kasas
01:20 - 01:30	Role of intravoxel incoherent motion MRI in diagnosis and assessment of invasiveness of urothelial bladder carcinoma. Dr. Mona Shawky
01:30 - 01:40	Incorporating Imaging, Clinical, Pathology. and Demographic Markers for Hormonal Therapy Prediction in Prostate Cancer. Dr. Mohamed Badawy
01:40 - 01:50	Precise Prostate Cancer Assessment Using IVIM-Based Parametric Estimation of Blood Diffusion from DW-MRI. Dr. Mohamed Badawy
01:50 - 02:00	Discussion
02:00 - 02:10	Trifecta in flexible ureteroscopy for treatment of renal and upper ureteral calculi: A multicenter study. Dr Ahmed Elhussein
02:10 - 02:20	Enhancing continence post holmium laser enucleation of the prostate: assessment of novel technique through randomized clinical trial. Prof. Ahmed Elshal
02:20 - 02:30	The Headache of Post-Transurethral Prostate Surgery Pyuria: Pursuit for Evidence. Prof. Ahmed Elshal
02:30 - 02:40	A randomized controlled trial evaluating low-intensity shockwave therapy for treatment of persistent storage symptoms following transurethral surgery for benign prostatic obstruction. Dr. Mohamed hagazy
02:40 - 02:50	The use of midurethral sling in the correction of low-stage cystoceles: a prospective randomized trial. Prof. Bassem Wadie
02:50 - 03:00	Discussion
03:00	Lunch
